

GEMOFOR
FOR A WORLD OF PERFORMANCE

G-2000F Feeder

SMOOTH ACCELERATION

Constantly innovating, GEMOFOR developed a feeder which, with its magnetic couplings, automatically synchronizes itself with the planer.

Adaptable to the speed of any kind of planer, the feeder smoothly aligns the lumber pieces, reducing risks of jam-ups in the production line.

Auto-synchronization and smooth alignment avoid quick movements and reduce risks of broken pieces in both the feeder and planer, thus lowering maintenance costs.

Advantages

- Smooth, slip-free acceleration.
- Simultaneous height adjustment.
- Each roll has its individual magnetic coupling.
- Feeding and motorization without "pineapples" reduce lumber damages.

Specifications

- Speed up to 2000 ft/minute.
- Chromed and grooved speeding rolls.
- Pivots on ball bearings.
- Shock absorption by pneumatic cushions.
- Quick clearance by pneumatic cylinder.

Now manufactured and sold by:
