GEM-O-WRAP

Automatic Wrapping Machine

US Patent #6,460,314
Canada Patent #2,277,565

LOGICAL SOLUTIONS FOR WRAPPING SECONDARY PROCESSING PRODUCTS!

The GEM-O-WRAP automatic wrapper wraps bundles of lumber efficiently and rapidly. This technology, which has been tried and tested, is sure to bring added value to your production line.

We know that wrapping must guarantee the quality of your lumber products from the mill to the customer. That's why the GEM-O-WRAP was designed to respond to the many challenges of wrapping wood products.

- Optimal protection against bad weather and the hazards of transportation.
- Efficient technology that is easy to use.
- Wood that stays healthy-looking, without mold or mildew.
- Flexibility of use, adapting to your mill's operation.
- Sturdy, dependable and long-lasting equipment.

GEM-O-WRAP

Automatic Wrapping Machine

Resistant under all conditions

The 5-sides wrapping system used in GEM-O-WRAP technology protects against excess humidity. Another advantage of this system is that the waterproof wrapping paper will not damage during forklifting. Bundles are wrapped to perfection and to complete uniformity. Weather-proof for outdoor storage, the wrapping guarantees the quality of the product.

To do this, the wrapper is equipped with a fully synchronized system of chains that provides a greater level of precision.

Economical in every sense

GEM-O-WRAP technology and its 5-sides wrapping system offers significant saving:

- cuts production time, as it wraps 16 feet bundles in 55 seconds;
- minimizes labour costs by reducing the number of wrapping operators;
- diminishes warehouse storage costs;
- reduces total wrapping costs by up to 45 %.

Remarkably self-operating, the GEM-O-WRAP wrapper has a ratio of 220 eight-foot bundles per 3,000 feet of rolled paper.

Moreover, it can use a full width paper dispenser: quadruple, triple, double or simple.

Safety: a necessity

Because the GEM-O-WRAP is completely automatic, it eliminates the risk of injuries during wrapping.

Flexible to your needs

Highly technological, the GEM-O-WRAP wrapper is highly flexible. Also, because of its simple and user-friendly touch-activated screen, you always have the control to choose how wrapping will be done and the type of bundles to be wrapped.

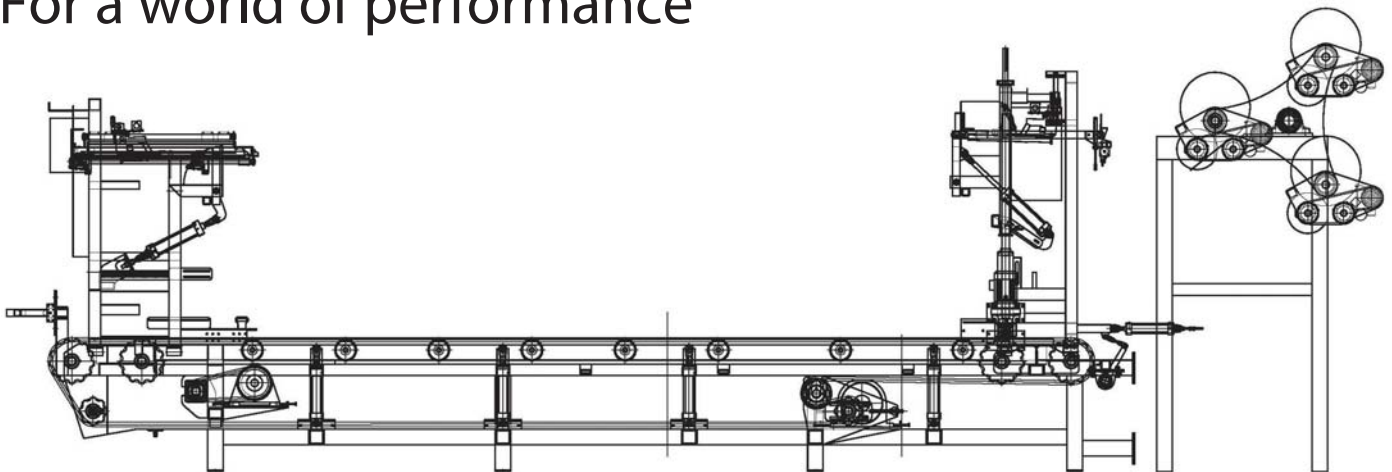

Thus, the GEM-O-WRAP can:

- wrap bundles already set on pallets;
- change the number of staples and their positioning;
- adapt to different bundle lengths, from 4 ft. to 20 ft. and longer;
- and, with the help of optional equipment, trim stickers that are too long that could damage the paper.

Superior quality components guarantee dependable and long-lasting equipment that is virtually maintenance-free.

- Double guide and magnetic cylinders.
- Automatic lubrication system.
- A wide variety of security systems to prevent an unexpected situation.
- Rotating analog encoder.
