

GEMOFOR
FOR A WORLD OF PERFORMANCE

G-2000H Horizontal Splitter

ADAPTABLE TO SPECIFIC NEEDS!

Aware of the ongoing evolution in the lumber industry, GEMOFOR has built a horizontal splitter which is adaptable to the needs and demands of the industry.

Installed at the planer's out feed, this machine allows to resaw boards into different, highly demanded formats. Indeed, it is much more profitable to plane one 1 ½" thick piece and then divide it into two than to plane two ¾" pieces. You save both time and money.

Advantages

- Lineal roll bearing displacement minimizes wearing.
- Screwed modular assembly.
- Chromed wear parts.

Specifications

- Screw adjustments on head bearing.
- Adjustments and locks: manual or automatic.
- Quick clearance by pneumatic cylinder.
- High-speed shaft on high-precision bearings.
- Driven by chains linked to preceding equipments or by motor.

Now manufactured and sold by:
